ENGAGE

Mr. Marketing & ishopamine / Digital & discovery

One ecosystem. Greater possibility.

SKYVELOR brings autonomous AI, audiovisual engineering, bespoke digital marketing, web experiences and luxury discovery into one connected technology ecosystem.

ILLUSTRATIVE ENVIRONMENT / CINEMATIC CGI

01

OUR PURPOSE

Connect technology to practical business needs: more capable teams, more engaging spaces, better digital journeys and intelligent discovery.

02

OUR APPROACH

Combine specialist venture identities with a unified gateway. Each venture has a clear purpose; together they create opportunities across physical and digital experiences.

03

OUR CONTEXT

Based in Riyadh, Kingdom of Saudi Arabia. A technology ecosystem built around clients, partners and emerging opportunities.

Four ventures.
One connected direction.

A complementary portfolio, with distinct specialisms and a shared ambition to turn technology into meaningful experiences.

CAESAR
TECH VISUAL
VISUALS THAT TRANSFORM

Engineering experiences. Connecting environments.

caesartechs is the audiovisual and smart systems integration venture: from large-format displays and professional sound to control rooms, digital signage, meeting and learning spaces.

ILLUSTRATIVE ENVIRONMENT / CINEMATIC CGI

01

DISPLAY & EXPERIENCE

LED walls and digital signage turn information into visible, engaging communication. The right display system considers content, viewing distance, ambient light and maintainability.

02

SOUND & COLLABORATION

Professional audio and smart meeting systems connect speakers, audiences and remote participants through coordinated room technology.

03

ENGINEERING & SUPPORT

Design, integration, installation and support connect equipment into an operational environment, rather than a collection of disconnected products.

CAESAR
TECH VISUAL
VISUALS THAT TRANSFORM

SKYVELOR
INFOTECHS
S.I.T

Make information impossible to miss.

Large-format LED walls and digital signage for communication, presentation and immersive visual environments.

ILLUSTRATIVE ENVIRONMENT / CINEMATIC CGI

01

LED WALLS

Solution planning considers screen dimensions, pixel pitch, brightness, viewing distance, content format and service access. Processing and source routing are central to a coherent visual system.

02

DIGITAL SIGNAGE

A signage environment connects displays, content players, scheduling and distribution. Application examples include reception areas, retail communication, hospitality and campus information.

03

BUSINESS VALUE

Present complex information clearly, reinforce a brand experience and give teams a consistent communication surface. Final specifications follow the site survey and agreed scope.

Sound that serves the space.

Professional sound systems and audio integration shaped around the room, audience and intended experience.

ILLUSTRATIVE ENVIRONMENT / CINEMATIC CGI

01

SYSTEM DESIGN

Application planning considers loudspeaker coverage, microphone placement, signal processing, amplification and room acoustics. Speech intelligibility is a core requirement for communication spaces.

02

APPLICATIONS

Illustrative environments include boardrooms, auditoriums, training rooms, hospitality spaces and presentation venues. Audio and display systems work together as a unified experience.

03

VALUE & VALIDATION

The goal is clear communication and consistent listening. Tuning, functional checks and operator handover should be defined within each project scope.

CAESAR
TECH VISUAL
VISUALS THAT TRANSFORM

SKYVELOR
INFOTECHS
S.I.T

Clarity at the center of operations.

Broadcast-grade control rooms and operations environments that bring multiple information sources into a shared view.

ILLUSTRATIVE ENVIRONMENT / CINEMATIC CGI

01

SHARED VISUAL CONTEXT

Video walls, source selection and workstation displays help operators see the information relevant to their responsibilities. Layout planning should reflect actual operator workflows.

02

INTEGRATED INFRASTRUCTURE

Room planning considers signal routing, AV control, equipment racks, cabling, operator sightlines and service access. Availability requirements are agreed at design stage.

03

POTENTIAL APPLICATIONS

Command centers, broadcast coordination and organizational operations rooms. These are application examples, not claims of completed installations or guaranteed response outcomes.

Meet naturally.
Learn interactively.

Smart meeting and learning environments where audiovisual technology supports the people using the room.

ILLUSTRATIVE ENVIRONMENT / CINEMATIC CGI

01

HYBRID MEETING ROOMS

Bring displays, cameras, microphones and speakers into one coordinated collaboration environment. User journeys should account for local presentations and remote participation.

02

LEARNING ENVIRONMENTS

Interactive displays and integrated audio support presentations, demonstrations and shared learning. The system should suit the teaching method and the room layout.

03

USER-CENTERED DESIGN

Simple source selection, understandable controls and appropriate training help users work confidently. Platform compatibility and integration details are confirmed during project design.

From brief to working environment.

An illustrative end-to-end project framework for caesartechs audiovisual integration. Deliverables and support commitments are agreed for each engagement.

01 / DISCOVER | **02 / ENGINEER** | **03 / INTEGRATE** | **04 / HAND OVER** | **05 / SUPPORT**

01 / DISCOVER

Clarify the use case, users, site constraints and business priorities. Assess room dimensions, content needs, infrastructure and operation expectations.

02 / ENGINEER

Develop the solution architecture, equipment selection and integration plan. Coordinate display, audio, control, connectivity and installation requirements.

03 / INTEGRATE

Install and connect the agreed systems. Confirm signal paths, interfaces and room operation through functional checks and commissioning activities.

04 / HAND OVER

Provide the agreed documentation and operational orientation. Confirm acceptance criteria and the ownership of day-to-day use.

05 / SUPPORT

Define ongoing support scope, service contacts and maintenance expectations. Response times and warranties depend on the agreed contract and products.

SUCCESS CRITERIA

Readable visuals. Clear audio. Understandable operation. Maintainable systems. Validate the criteria relevant to the project rather than assume a universal specification.

Plan precisely.
Deliver coherently.

caesartechs connects design decisions to the realities of installation, everyday operation and support.

ILLUSTRATIVE ENVIRONMENT / CINEMATIC CGI

01

BEFORE INSTALLATION

Confirm viewing distances, ambient light, room acoustics, infrastructure and equipment access. Coordinate display, audio, control and connectivity as one system.

02

AT COMMISSIONING

Check the agreed sources, microphone paths, display layouts and user controls. Validate room operation against the acceptance criteria defined in the project brief.

03

AFTER HANDOVER

Provide agreed documentation and operator orientation. Define maintenance ownership, support contacts and escalation procedures within the engagement terms.

Agent Forces

Autonomous AI workforce

ILLUSTRATIVE ENVIRONMENT / CINEMATIC CGI

Sales & support / Research / Back-office workflows

AGENT FORCES

An autonomous AI workforce.

Agent Forces builds and deploys specialized autonomous agents for sales outreach, customer support, research and back-office workflows.

ILLUSTRATIVE ENVIRONMENT / CINEMATIC CGI

01

SALES & SUPPORT

Agents can support outreach preparation, inquiry handling and repeatable service workflows. Define escalation paths so people remain responsible for exceptions and important decisions.

02

RESEARCH & OPERATIONS

Specialized workflows help gather information, organize routine tasks and support back-office activity. The relevant tools, sources and permissions are set for each use case.

03

CONTINUOUS WORKFLOWS

Designed for around-the-clock operation and custom workflow deployment. Actual availability, deployment timing and performance depend on the agreed environment and scope.

AGENT FORCES

Automate the repeatable. Elevate the human.

Illustrative adoption journey: begin with a clear operational task, connect the right information and measure the result.

ILLUSTRATIVE ENVIRONMENT / CINEMATIC CGI

01

DEFINE THE TASK

Identify a repetitive workflow, its inputs, expected outputs and acceptable boundaries. Suitable starting points include inquiry triage, research preparation and routine administrative support.

02

CONNECT & SUPERVISE

Establish tool access, relevant information sources and approval or escalation points. Human oversight remains important for sensitive actions and business-critical decisions.

03

MEASURE & IMPROVE

Agree practical indicators such as completion quality, exception handling and time saved. This profile does not claim a fixed productivity gain or replace project-level validation.

Mr. Marketing

Digital presence & brand communication

ILLUSTRATIVE ENVIRONMENT / CINEMATIC CGI

Digital marketing / Social media / Website development & design

Build your presence. Grow your relevance.

Mr. Marketing is SKYVELOR’s digital marketing venture, connecting brand communication, social media, website development and design into a coherent digital presence.

ILLUSTRATIVE ENVIRONMENT / CINEMATIC CGI

01

DIGITAL MARKETING

Shape campaign objectives, audience priorities and a practical channel plan. Connect creative messages, landing pages and agreed measurement so marketing activity follows a clear business brief.

02

SOCIAL MEDIA

Develop content themes, editorial calendars and platform-appropriate creative. Coordinate brand voice, visual consistency and community communication around the people the business wants to reach.

03

WEBSITES & DESIGN

Design and develop websites that reflect the brand and support real customer journeys. Combine clear navigation, responsive layouts and purposeful content with the functionality agreed for each project.

A stronger brand.
A better digital journey.

Website design and development bring the marketing message into a usable, visually consistent destination.

ILLUSTRATIVE ENVIRONMENT / CINEMATIC CGI

01

EXPERIENCE & CONTENT

Structure information around customer needs. Define page hierarchy, calls to action and content priorities before creating polished interface designs.

02

DESIGN & DEVELOPMENT

Translate the brand into consistent typography, imagery and layouts. Build the agreed website behavior for desktop, tablet and phone, with integrations defined in the project scope.

03

REVIEW & EVOLVE

Validate important journeys, prepare content handover and agree future improvements. Hosting, maintenance, analytics and support arrangements are confirmed separately for each engagement.

One voice.
Every touchpoint.

An illustrative marketing framework connects strategy, creative production, publishing and reporting.

01

STRATEGY & PLANNING

Clarify the audience, communication goals and channel mix. Build a content calendar around relevant themes, product priorities and campaign moments.

02

CONTENT & CREATIVE

Coordinate graphic design, photography direction, social formats and website assets. Keep messages and visual identity consistent across customer touchpoints.

03

MEASUREMENT & LEARNING

Agree relevant indicators, review available campaign and website data, and refine the next cycle. No fixed growth, reach or conversion result is guaranteed.

SHOFING.DOPAMINE
SEE IT. WANT IT. OWN IT. FEEL IT.

ishopamine

Luxury discovery & experience

ILLUSTRATIVE ENVIRONMENT / CINEMATIC CGI

14 curated worlds / Dopamine Credits / Reality Switch™

SHOFING.DOPAMINE
SEE IT. WANT IT. OWN IT. FEEL IT.

Desire meets intelligent discovery.

ishopamine is a luxury commerce experience built around dopamine-led discovery: explore what attracts you before moving toward possible ownership.

ILLUSTRATIVE ENVIRONMENT / CINEMATIC CGI

01

14 CURATED WORLDS

A discovery framework across fourteen luxury worlds. The experience is designed to connect aspiration, exploration and personal preference.

02

DOPAMINE CREDITS

Credits form part of the platform’s virtual discovery and acquisition concept. Their rules and availability follow the platform’s current terms; this profile makes no cash-value claim.

03

REALITY SWITCH™

An experience concept connecting virtual exploration to the possibility of real-world ownership. Actual products, availability and transaction terms are determined by the platform.

SHOFING.DOPAMINE
SEE IT. WANT IT. OWN IT. FEEL IT.

Explore the feeling. Understand the choice.

A luxury discovery journey that places curiosity and considered preference before the decision to acquire.

ILLUSTRATIVE ENVIRONMENT / CINEMATIC CGI

01

DISCOVER

Explore curated luxury environments and product experiences. The imagery in this profile represents aspirational categories, not a confirmed live catalog.

02

EXPERIENCE

Use the platform’s discovery concepts to understand what appeals to you. Dopamine-led is an experience positioning, not a medical or scientific outcome claim.

03

CONSIDER OWNERSHIP

Where offered, move from virtual interest toward a real-world opportunity through Reality Switch™. Product availability, pricing and fulfillment depend on current platform terms.

Physical spaces.
Digital intelligence.

Illustrative cross-venture opportunities show how complementary capabilities can respond to a larger client brief. Integration is assessed and agreed per project.

01

INTELLIGENT WORKPLACE

caesartechs can shape collaboration spaces; Mr. Marketing can shape a related website and communication journey; Agent Forces can support defined routine workflows.

02

CONNECTED CUSTOMER EXPERIENCE

caesartechs can provide the audiovisual communication layer; Mr. Marketing can design the website and marketing journey; Agent Forces can support inquiry and research tasks.

03

LUXURY DISCOVERY

ishopamine introduces the discovery concept. Potential supporting digital and audiovisual experiences can be explored with the specialist ventures, subject to a defined scope.

Start with the outcome. Build the right combination.

A clear brief helps identify the venture, solution and delivery approach that best fit your needs.

ILLUSTRATIVE ENVIRONMENT / CINEMATIC CGI

01

WHAT TO SHARE

Your business objective, target users, current challenges, intended location or digital environment, desired timeline and budget parameters.

02

WHAT TO DEFINE

The required capabilities, integration dependencies, acceptance criteria and support expectations. For AV projects, room plans and existing infrastructure are especially useful.

03

WHAT HAPPENS NEXT

Discuss fit and priorities with SKYVELOR, identify the relevant venture and shape a scoped proposal. No universal price, delivery time or service level is implied by this profile.

Specialist expertise.
One corporate direction.

SKYVELOR is the main company bringing complementary venture capabilities into a single point of conversation.

01

PHYSICAL EXPERIENCE

caesartechs: LED walls, professional audio, control rooms, digital signage, smart meeting spaces and interactive learning environments. Scope spans design, integration and agreed support.

02

INTELLIGENCE & COMMUNICATION

Agent Forces: specialized AI workflows. Mr. Marketing: digital marketing, social media, website development and design. Each venture contributes to a clearly defined brief.

03

DISCOVERY & OPPORTUNITY

ishopamine: luxury discovery across fourteen curated worlds. SKYVELOR helps identify the relevant combination; cross-venture delivery is assessed and agreed per project.

Your next opportunity starts with a conversation.

Connect with SKYVELOR to discuss audiovisual environments, autonomous AI workflows, digital marketing, website design or luxury discovery.
